

HARINI M

BE CSE Student | Full-Stack, Mobile & DevOps Enthusiast

Madurai, Tamil Nadu | +91 9345304624 | harinimurugesan14@gmail.com | LinkedIn: harini-murugesan-06856a330 | GitHub: harinimurugesan14

SUMMARY

Motivated B.E. Computer Science and Engineering student with a strong foundation in Java, Python, and the MERN stack, and hands-on experience in Flutter mobile development and DevOps automation. Skilled at building and deploying end-to-end applications, from web platforms to containerized, orchestrated deployments using Docker, Kubernetes, and Jenkins. Quick learner, detail-oriented, and effective in collaborative team environments.

EDUCATION

SRM Madurai College for Engineering and Technology

CGPA: 8.5

B.E. Computer Science and Engineering (2023 - 2027)

TECHNICAL SKILLS

- **Languages:** Java, Python, Dart
- **Full-Stack Development:** MongoDB, Express.js, React.js, Node.js (MERN Stack)
- **Mobile Development:** Flutter, Dart, Android app design & builds
- **DevOps & Cloud:** Docker, Docker Hub, Kubernetes (Minikube), Jenkins, Helm Charts, NGINX Ingress, ConfigMaps & Secrets
- **Tools:** Git, GitHub, VS Code

INTERNSHIP EXPERIENCE

Flutter Development Intern | Abservetech Consultancy Pvt. Ltd., Madurai

Jun 2026 - Jul 2026

- Completed a 1-month Flutter development internship, building “Cookify”, a food recipe mobile application, with performance recognized as exceeding expectations on the official completion certificate.

MERN Stack Intern | SDLC, Madurai

Dec 2025 - Jan 2026

- Worked on full-stack web development tasks using MongoDB, Express.js, React.js, and Node.js.

Java Intern / Project Work | Maxgen Technologies Pvt. Ltd.

Jun 2025 - Jul 2025

- Contributed to Java-based application development and project work as part of the internship.

PROJECTS

End-to-End CI/CD Pipeline Automation | DevOps

- Built and automated a complete CI/CD pipeline using GitHub, Jenkins, Docker, Docker Hub, and Kubernetes (Minikube) for continuous build, deployment, and rolling updates.
- Implemented NGINX Ingress, ConfigMaps, Secrets, and Helm Charts to manage application routing, configuration, secure credentials, and Kubernetes deployments.
- Automated Docker image versioning, Kubernetes deployments, and Helm upgrades, enabling scalable, zero-downtime application delivery.

Driver Drowsiness Detection System | AI/ML

- Developed a real-time driver drowsiness detection system using Python, OpenCV, and machine learning-based facial landmark detection to monitor eye closure and yawning patterns via webcam.
- Computed Eye Aspect Ratio (EAR) to identify drowsy states and triggered real-time audio alerts to help prevent accidents caused by driver fatigue.

Cookify - Food Recipe App | Flutter

- Built a mobile food recipe application in Flutter during the Abservetech internship, enabling users to browse, search, and save recipes.

Student Management System | Java

- Designed a Java-based system to manage student records, academics, and administrative data.

Exam Hall Management System | Web Application

- Built a web application to automate exam hall seating allocation and management.

Online Tutoring Platform | MERN Stack (Concept)

- Conceptualized a MERN stack platform connecting students with tutors for online learning.

CERTIFICATIONS & ACTIVITIES

- Flutter Development Internship Completion Certificate - Abservetech Consultancy Pvt. Ltd. (Jul 2026)
- Basics of Business Communication - Infosys Springboard (Apr 2025)
- Salesforce Developer: Introduction to Artificial Intelligence - Alison
- JavaScript Full Stack Development - Infinite Computer Coaching Centre
- Machine Learning and AI for Electronics Design - SRM IST (Feb 2025)
- WEBSPRINT'25 - Regional Level Hackathon Participant
